

HIGH VELOCITY PROTECTION
ON DUTY

TACTICAL EYEWEAR & GLOVES

WHEN GOOD ENOUGH ISN'T GOOD ENOUGH, WILEY X SHOOTS FOR A HIGHER STANDARD.

When it comes to our troops and law enforcement officers, no amount of protection is too much. As an ISO 9001-2008 business we meet a higher standard than competitors' "marketing claims." Per required government specifications and as outlined by ISO 9001-2008 and ANSI Z87.1-2008 standards we continue to meet the government's highest Ballistic Impact Standards. Wiley X has in fact successfully impacted our product far beyond the range that our ballistic chronometers can accurately measure.

SELECT WILEY X PRODUCTS MEET OR EXCEED MIL-PRF-31013 AND MIL-DTL-43511D VO BALLISTIC IMPACT STANDARDS FOR SPECTACLES AND GOGGLES RESPECTIVELY. MIL-PRF-31013 REQUIRES A SPECTACLE TO WITHSTAND THE IMPACT OF A .15 CALIBER FRAGMENT FIRED AT 640-660 FPS, WHILE MIL-DTL-43511D REQUIRES A GOGGLE TO WITHSTAND THE IMPACT OF A .22 CALIBER FRAGMENT FIRED AT 540-560 FPS.

FOR MORE THAN TWO DECADES, Wiley X is proud to be family and U.S. Veteran owned and operated. As a global leader in the research and development of protective eyewear and gloves to military and law enforcement personnel, Wiley X's high performance products have become standard issue with the U.S. Army, Navy, Air Force and Marines.

From elite military units to local S.W.A.T. teams, Wiley X sets the benchmark for safety and utility. All Wiley X tactical eyewear models meet or exceed stringent military ballistic impact standards. As an ISO 9001:2008 Certified Business, we believe continual improvement isn't just a goal; it is a requirement. This means when it comes to the entire line of Wiley X ultra protective eyewear and gloves, the next pair you get will be better than the last pair you received.

WHEN ALL HELL BREAKS LOOSE,
count on Wiley X to be there keeping America's protectors and defenders safe.

Wiley X has earned the distinguished designation of being ISO 9001:2008 certified. This verifies that our production processes and products meet the highest quality standards.

THE WILEY X FACTOR:

SHATTERPROOF LENSES. DURABLE FRAMES. WELL PROTECTED ARMED FORCES.

SHATTERPROOF SELENITE™ POLYCARBONATE LENSES.

Each Wiley X lens is made from one of the world's most impact resistant lens materials. They far exceed ANSI Z87.1 safety and ANSI Z80.3 optical standards.

SCRATCH RESISTANT HARDCOATED LENSES

Our super strong impact resistant Selenite™ lenses have longer life due to the addition of just the right amount of hard coatings. Too much hard coat and a lens will break on impact; too little and it will scratch too easily, reducing the wearable life of the lens.

VIRTUALLY UNBREAKABLE TRILOID NYLON FRAMES

Customers have even reported that frames run over by moving vehicles remain intact. That's the immeasurable advantage of owning a Wiley X.

ULTRA FOAM™ AND FACIAL CAVITY™ SEALS

Select styles totally seal your eyes from the environment with Ultra Foam™ inserts that utilize our patented Facial Cavity™ technology.

FOLD OUT
FOR LENS & FRAME
REFERENCE

THE DUTY OF WILEY X LENSES.

Not only do Wiley X lenses withstand tough ballistic impact tests, they also meet ANSI optical clarity standards. All Wiley X lenses block 100% of the sun's harmful UVA and UVB rays (up to 400 nanometers). The difference between Wiley X lenses and ordinary lenses is noticeable. It's also certified by rigorous ANSI testing.

RESOLVING POWER (CLARITY)

Ordinary lenses can distort objects viewed from a distance, as demonstrated in the Right image above. As measured in tests utilizing the NBS Pattern 20, Wiley X lenses (image Left) provide a clear view. This difference can be critical during tactical missions.

REFRACTIVE POWER

Inferior lenses can alter the true size of objects, as if looking through another person's prescription lens (above Right image). Wiley X ANSI certified lenses maintain true relative object size.

PRISMATIC POWER

It is common for ordinary lenses to bend light, causing focal objects to appear off center. Wiley X ANSI certified lenses provide a true spatial relationship of objects in the field of view, invaluable for visual sighting. Hit the target the first time with Wiley X optically superior lenses.

LENS ANATOMY

SMOKE GREY LENSES Maximum glare reduction. Won't distort colors. Excellent in bright/glare conditions. Light transmission: 15%.

CLEAR LENSES Maximum light transmission. See precise color values. Hazy or overcast, dusk/dawn conditions. Light transmission: 90%.

LIGHT RUST LENSES Filters out blue light waves, the chief component of glare and haze. Enhance contrast in medium to low-light conditions. Light transmission: 53%.

LA™ LIGHT ADJUSTING SMOKE GREY LENSES Darken as the brightness of the sun dictates. Maximize optical clarity. Light transmission: 85% to 17% (in sunlight).

VERMILLION LENSES Are best for medium to low light conditions. Sharpens contrast and brightens targets. 50% light transmission.

2-LINE LASER LENSES
Single laser frequency protection.

3-LINE LASER LENSES
Multiple laser frequency protection.

ICON DEFINITIONS

Meets or exceeds MIL-DTL-43511D (goggles) and MIL-PRF-31013 (spectacles).

Wiley X ANSI approved frames can accommodate prescription safety lenses up to +6.00/-6.00 Total Power. Certain restrictions apply—ask your Account Representative for more details.

Meets or exceeds ANSI Z87.1-2003 high velocity impact safety and optical standards.

Our patented removable Facial Cavity™ Seal blocks out wind, debris and peripheral light.

THEIR

AVOIDANCE

ASSESSMENT

Shatterproof Wiley X frames and lenses are subjected to **RIGOROUS BALLISTIC TESTS**, meeting the military's stringent impact safety and optical standards.

Flying shrapnel, ejecting casings, even altercation with a perp can shatter ordinary eye protection, and expose eyes to blunt force trauma.

House to house searches on high alert can be compromised if tactical eyewear cannot adjust to the constantly changing interior and exterior light conditions.

Some Wiley X eyewear styles feature **LA™ LIGHT ADJUSTING LENSES** that automatically adjusts tint to changing light conditions.

Extreme temperatures and physical exertion during tactical operations can create heat build up and fogging in protective eyewear.

WILEY X TOP DOWN™ VENTILATION

utilizes vents at the top and bottom of the goggle frame to increase airflow and prevent fogging. Optimal vision during sensitive operations is maintained.

Soldiers and law enforcement personnel who wear prescription glasses often have to sacrifice optical clarity in order to utilize protective eyewear.

Wiley X has created **MULTI-PLATFORM RX INSERTS** that fit into Goggles and Spectacles. One Rx insert will fit into 4 different platforms, saving you money. The Rx Carrier features a quick and easy push in - pull out change over.

Changing weather and light conditions during the day can create need to purchase or carry multiple pairs of eyewear, each with a different lens tint. The typical result is to possess only one pair, for which the lens won't be optimized for all conditions.

Wiley X **CHANGEABLE TACTICAL SUNGLASSES** come with multiple lenses that easily snap out of and into the same frame, requiring the purchase/possession of only one pair that can be quickly adapted to changing light conditions.

GOOGLES

Good enough isn't good enough in a world of rotor wash, flying debris and projectiles. Wiley X Goggles are built to exceed the military's stringent Ballistic Impact Protection standard. And exclusive Top Down™ ventilation technology prevents fogging and keeps things cool in the heat of battle.

TERMS AND CONDITIONS

All Wiley X models may be combined when compiling a quantity order. Extreme care is taken when packaging all products we ship. If a discrepancy occurs, a claim should be made immediately.

Standard Terms: NET30 (upon credit approval); COD Invoices incur minimal shipping and handling fee; Credit Card (Visa, Master Card, Discover, American Express)

EYEWEAR LIMITED LIFETIME WARRANTY

All non-prescription Wiley X, Inc. eyewear is warranted to the original purchaser for life against manufacturing defect in materials and workmanship (except Light Adjusting [L.A.] lenses, which have a tint adjustment life of 18 months. Proof of Purchase for L.A. lens products required). Original purchaser must include a shipping, handling and processing fee of \$9.00 and applicable tax (to be paid by credit card) with any warranty claim. To begin warranty/repair evaluation process or for additional information about the Wiley X, Inc., Limited Lifetime Warranty, go to <http://www.wileyx.com/support/warranty.aspx> or call 800-776-7842.

PRESCRIPTION FRAME WARRANTY

Wiley X, Inc., prescription sunglass warranties must be handled through the local retailer or dispensing optician you originally purchased from. **Proof of purchase required.** Warranty is for 1-year, but is void if prescription was originally handled by any lab "not authorized" by Wiley X, Inc. For additional assistance regarding prescriptions, please refer to the FAQ's at <http://www.wileyx.com/prescriptions>

GLOVES WARRANTY

All Wiley X, Inc., gloves are warranted to the original purchaser for 2 years against manufacturing defect in materials and workmanship. Original purchaser must include a shipping, handling and processing fee of \$9.00 and applicable tax (to be paid by credit card) with any warranty claim. To begin warranty/repair evaluation process or for additional information about the Wiley X, Inc., Warranty, go to <http://www.wileyx.com/support/warranty.aspx> or call 800-776-7842.

RETURNS AND EXCHANGES

Returns and exchanges will not be accepted without receiving prior authorization. Returns must be in resalable condition, as determined by Wiley X for product not discontinued longer than six months. All returns must be shipped prepaid from point of origin, unless prior arrangements have been made. No COD returns accepted. New orders resulting from exchanges will be shipped upon receipt of returned merchandise unless other arrangements have been made with Wiley X. Customers are responsible for all shipping charges, both inbound and outbound. Returns should be sent attention: RETURNS DEPARTMENT.

WILEY X BLACK OPS

Inspired by the shadowy realms of covert operators, Wiley X Black Ops was created for elite-level military personnel, law enforcement personnel, and hard-core shooters. Black Ops fuses stealth design with the High Velocity Protection you've come to expect from Wiley X: shatterproof lenses and nearly indestructible frames that exceed ANSI Z87 standards, Top Down™ ventilation, Rx-ready frames, and removable foam Facial Cavity™ seals. High velocity protection, sleek style – **Black Ops is the only eyewear worthy of those who wear it.**

STEALTH DESIGN AND SHATTERPROOF LENSES

ANSI HIGH VELOCITY IMPACT TEST

ANSI requires that our frames and lenses withstand the impact of a .25 inch diameter steel ball fired at a speed of 150 fps. Absolutely no contact with the head-form is allowed. We repeat this test 20 times from different angles aimed at different areas of the lens to make sure our lenses are practically indestructible.

ANSI HIGH MASS IMPACT TEST

To earn the coveted ANSI Z87.1-2003 certification, Wiley X frames and lenses must withstand the weight of a 1.1 lb. pointed projectile dropped from a height of 50". The lens must remain intact and no part of the frame can be detached. That pretty much ensures they'll stand up to anything your customers will encounter.

THE MARK OF HIGH PERFORMANCE CERTIFICATION

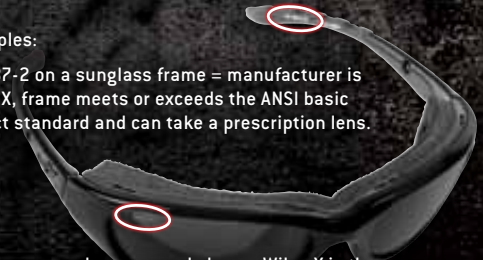

Your customers can be assured Wiley X meets the highest certification standards because we test and mark all our frames, temples and lenses with the appropriate ANSI certifications.

Mark Component / Where to Find It / What It Means	
WX	Precedes all ANSI frame and lens certification marks. / Wiley X is the manufacturer.
Z87	Inside frame and temples of spectacles (sunglasses); inside frame and lens housing or lens carrier of goggles. / The sunglass frame or goggles frame passes the ANSI basic impact test.
-2	Inside frame and temples of spectacles (sunglasses). / The frames can be fitted with a prescription lens, which is the case with almost all Wiley X sunglasses.
+	On a spectacle (sunglass) or goggle lens. / Lens meets or exceeds the ANSI High Velocity Impact standard.
S	On a spectacle (sunglass) or goggle lens. / Lens is a filter or shaded lens (not clear).
V	On a spectacle (sunglass) or goggle lens. / The lens is variable-tint photochromic (light adjusting).

Examples:

WX Z87-2 on a sunglass frame = manufacturer is Wiley X, frame meets or exceeds the ANSI basic impact standard and can take a prescription lens.

WX+S on a sunglass or goggle lens = Wiley X is the manufacturer, the lens meets or exceeds the ANSI High Velocity Impact standard and is shaded (not clear).
