

HP LTO-5 STORAGE MEDIA

LASTING INNOVATION you can **DEPEND ON.**

Top IT manufacturers are investing in it.

Big computer users have big plans for it. Countless smaller organizations know it makes sense. Who says tape doesn't have a future? Magnetic tape remains the best option for archival data storage, quietly safeguarding your data through years of uncertainty.

And now, it's bigger, better and faster than ever. The latest HP Ultrium LTO-5 storage solution can archive 3.0 TB on a single tape, at a transfer rate of 280 MB second. Extreme environmental, drop, shock and vibration testing in the real world and in HP's labs prove it far beyond user expectations, with a guaranteed archival life of 30 years. Depend on it.
